

1. A vapor-venting containment bag comprising:
 - i) an open configuration and a closed configuration;
 - ii) a VVE rating of at least about 40 and less than about 90, as measured in the Vapor Venting Evaluation Test; and
- 5 wherein when the bag is in its closed configuration the bag comprises at least three flexible side walls and a three dimensional interior void space is formed whereby the bag resists collapsing.
2. A bag according to Claim 1 which has a VVE rating of at least about 60 and less than about 90.
3. A bag according to Claim 1 which has a VVE rating of at least about 60 and no greater than about 80.
4. A bag according to Claim 1 which is formed from film which is heat resistant up to at least about 260°C.
5. A bag according to Claim 1 which is formed from nylon or polyester.
6. A bag according to Claim 1 further comprising a first fastening device and a second fastening device, which together form a mechanical fastener.
7. A bag according to Claim 1 further comprising a first fastening device and a second fastening device, which together form an adhesive fastener.
8. A bag according to Claim 1 which comprises at least four side walls configured in the form of a tetrahedron.
9. A bag according to Claim 1 which comprises at least six side walls configured in the form of a cube.

10. A process for cleaning or refreshing a fabric article by adding to a vapor-venting containment bag according to Claim 1 a fabric cleaning/refreshment composition comprising water and the fabric article to be cleaned or refreshed.

11. A process according to Claim 10 which is carried out in a hot air clothes dryer at a temperature from about 40°C to about 150°C, whereby malodors present on the fabric article are vented from the bag by means of a vapor-venting closure.

12. A kit for cleaning or refreshing a fabric article, comprising a package containing:

- (a) one or more absorbent articles comprising a carrier which releasably contains water and optional non-water fabric cleaning/refreshment ingredients; and
- (b) a vapor-venting containment bag according to Claim 1.

13. A kit according to Claim 12 further comprising from one to about ten of the absorbent articles which are disposable after a single use.
